

"Occasional adjustment  
to suit your height"

## FLEXIBASIC

### YOUR KITCHEN CABINET COMES FORWARDS AND REACHES NEW HEIGHTS

Electrical height adjustable system Diagonal is a system of cabinets that runs diagonally down and forward in one movement in order for you to reach the contents of the cabinets.

Ideal for users of slight stature and for wheelchair users at home, in sheltered accommodation or nursing homes.

Especially for people with limited reach it is an advantage that the cabins run diagonally down and forward so the limited reach is not so long.

You can combine more upper cabinets in one system by using the Diagonal system.

Movement of the system is by push button, normally mounted into the worktop fascia.

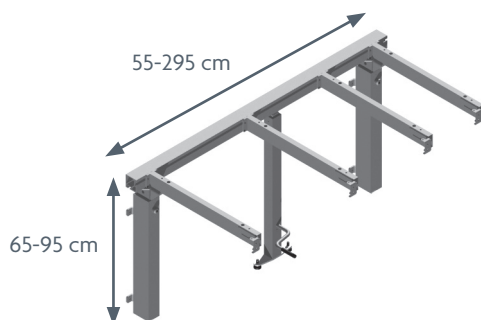

The lifting unit is removed when the table height is adjusted.

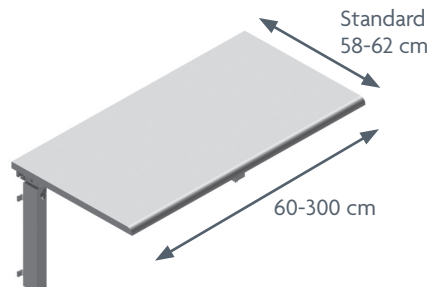

# FLEXIBASIC

Max. load: 150 kg evenly distributed  
Height: 65-95 cm  
Length: 60-300 cm  
Colour: RAL 9010

LENGTH OF WORKTOP	60-100 cm	105-150 cm	155-200 cm	205-250 cm	255-300 cm

### TIPS:

- Leg and tabletop support arms can be moved sideways leaving space for various inset hob or sinks.
- Use fascia panels of 6-8 cm under the tabletop in order to hide the tabletop support arms.
