

“Perhaps the best table
you will ever come across”

ROPOX VISION TABLE

EXCELLENT FUNCTIONALITY AND LONG-LASTING DESIGN

Whatever you look for in a table, our Vision table range most probably has it. The Vision series offers an array of worktop sizes, models and adjustment options, to ensure we can meet whatever need you might have, no matter your height or physical capabilities.

The Vision tables have a range of features that will make your life easier: You can tilt the table top and shorten the distance to the documents on the worktop. You can keep your documents in place with the MagRule magnet even when the table top is tilted. The tabletop has a matte surface, therefore no annoying glare. You can adjust the height manually or through a light pressure on the control switch, and you can use the arm supports to relieve your forearms, and as a help to a balanced sitting posture.

The Vision is highly recommended for both adults and children and also by wheelchair users who favour that they can sit close at the table, since there are no cross bars underneath the table top.
