Product information

It is important to read this manual before use.

Product: Ropox Dock-in

Manufacturer: Ropox, DK-4700 Naestved, Tel. +45 55 75 05 00

Application: This Ropox Dock-in station is used in connection with the Ropox swing washbasin. It is designed to provide an extra tabletop around the washbasin and to increase the stability and safety when the washbasin is locked. The Dock-in station is ideal for use in private homes, care centres or similar institutions.

Components

40-40069 Ropox Dock-in

+

Technical data

Height adjustment	150mm
Materials	Tabletop: Molded marble and polymer with sanitary gelcoat surface Frame: Surface-treated steel Locking mechanism: Stainless steel
Surface treatment	Steel: Blue chromate, powder-coated, white RAL 9003 mat
Maximum load	According to DS/ISO 17966 maximum user weight is 245kg. The Ropox Dock-in is designed to support and stabilise the washbasin so that a person of 245kg may lean on the washbasin when it is locked. The weight of 245kg is based on a person positioned at an angle of up to 45°.

This product has CE-marking and has been tested according to the European standard for assistive devices for disabled persons DS/ISO 17966 and the medical device regulations (EU)2017/745.

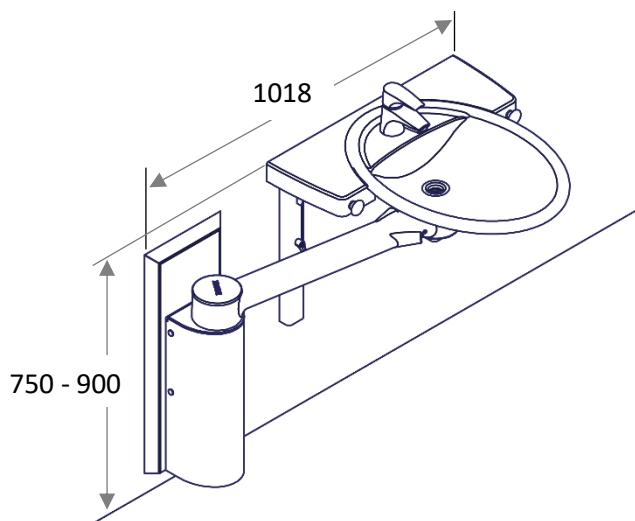

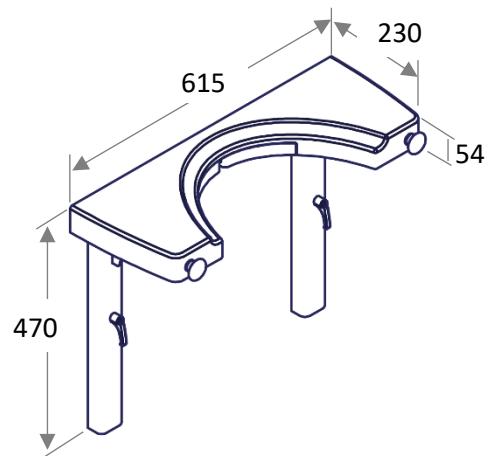

This product is UKCA-marked in accordance with:

UK SI 2002 No. 618 - *The Medical Devices Regulations 2002*, and its amendments

UK SI 2008 No. 1597 - *The Supply of Machinery (Safety) Regulations 2008*, and its amendments

Dimension sketches

Installationsgrænseflader

Construction

The wall must be made of a material suited for screw mounting and approved for damp rooms.

The hatched area is the minimum area for reinforcement of the wall.

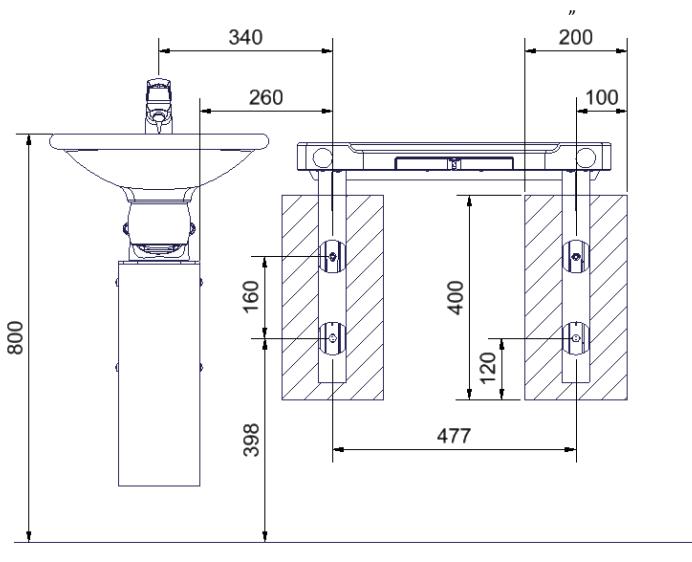

Reinforcement from floor to ceiling is advisable.

Tested according to DS/ISO 17966:2016, the maximum user weight has been fixed at 245kg (539lbs) when the wash basin is in the Dock-in and 80kg (176 lbs) when wash basin is out of the Dock-in.

Max. tensile load of upper screws

136kg/screw (300 lbs)

The unit will be supplied with a set of 4 screws and rawlplugs suitable for mounting on a concrete wall. The fitter should always consider the material, condition and strength of the wall and use screws and rawlplugs suitable for the specific wall type.

40-41110 and 40-41120

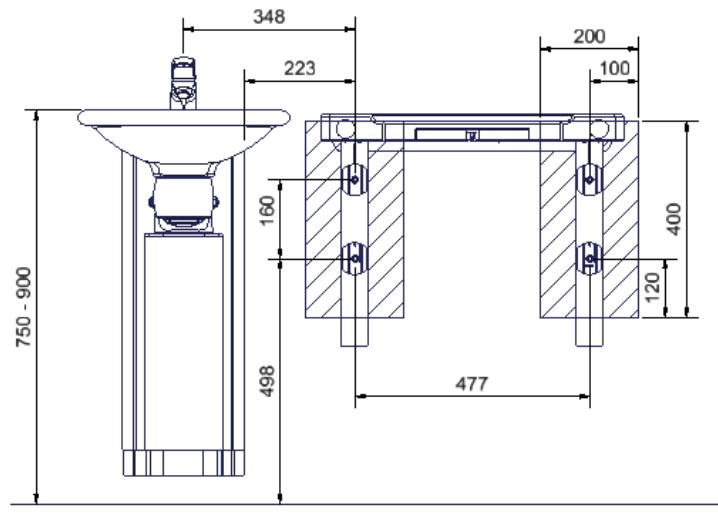

NOTE:

All dimensions are based on a fixed height of the wash basin of 800mm (31 1/2") above floor level.

If a change of these dimensions is required, the recommended dimensions must be changed accordingly.

Ropox can supply a mounting plate at request.

40-41130 and 40-41140

NOTE:

All dimensions are based on a height of the wash basin of 750-900mm (29 1/2" – 35 1/2") above floor level.

If a change of these dimensions is required, the recommended dimensions must be changed accordingly.

Ropox can supply a mounting plate at request.

Instructions

Daily use

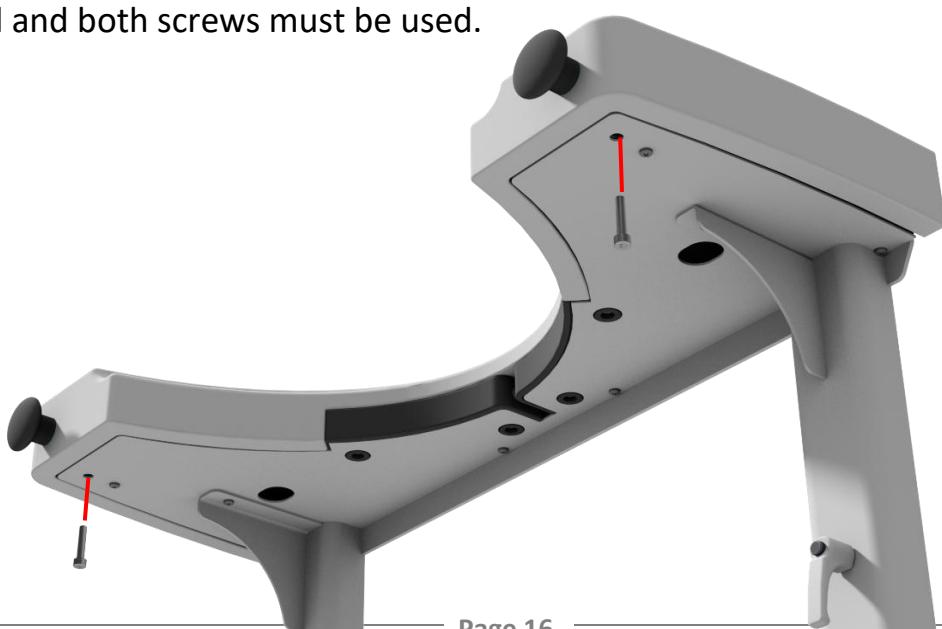

The Dock-in station is designed to ensure easy locking of the washbasin during daily use.

The washbasin is guided into the notch and will be locked automatically in the right position. To release the washbasin pull one of the two handles. This will release the washbasin from the locking mechanism after which it may swing freely.

Permanent lock

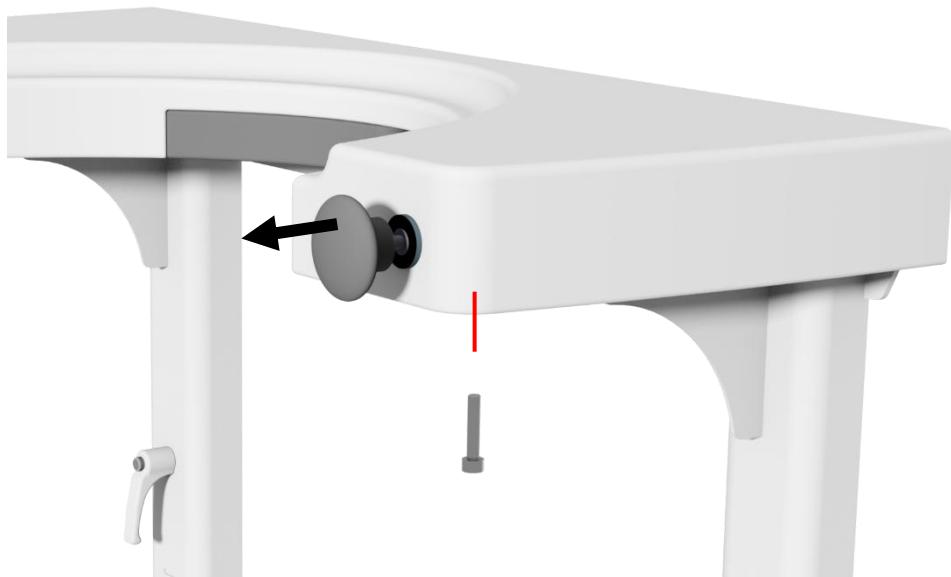

The wash basin can be permanently locked and thereby function as a standard wash basin. This is done by inserting the two supplied M5 screws as shown below. Please note that the wash basin needs to be locked in the Dock-in when the screws are tightened and both screws must be used.

Instructions

Deactivation of the lock

It is also possible to use the screws to deactivate the locking system if desired. This is done by inserting and tighten one of the screws while pulling out the handle. This only has to be done in one of the side to work.

Recommendations

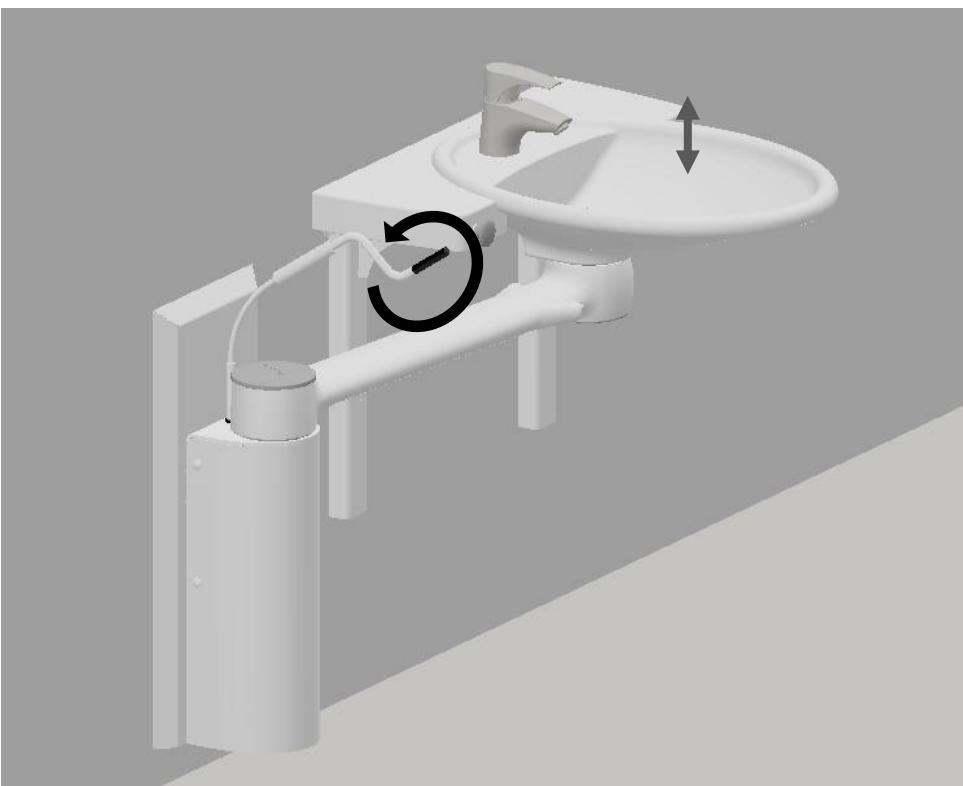

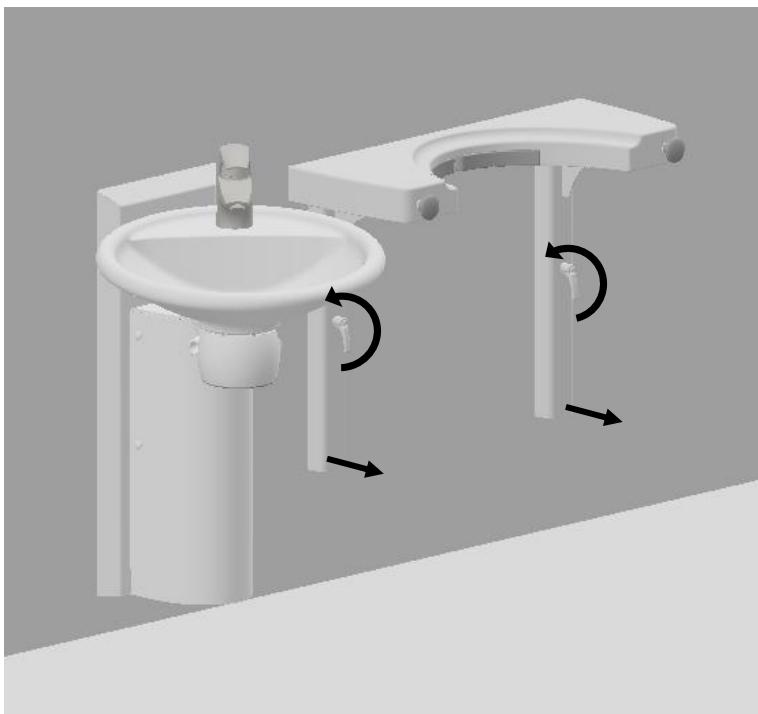

To ensure optimum utilization of the features of the Ropox Dock-in station and to avoid accidents it is important to follow these basic safety procedures.

- Be careful not to load the washbasin during coupling with the Dock-in station. This may result in inaccuracies and mean that the washbasin cannot be locked or hits the upper or lower edge of the Dock-in station.
- To obtain a long life of the locking mechanism as well as proper locking of the washbasin it is recommended to guide the washbasin slowly during coupling with the Dock-in station.
- Please note that the Dock-in station is designed to provide stability so that you may lean on but **not** hang on it.

Instructions

Height adjustment

The Dock-in station can be easily height adjusted together with the Swing Wash Basin as shown. Make sure that the Dock-in station is level after the height adjustment, and insure that the Wash Basin is easy to insert and release from the Dock-in station.

Maintenance

Ropox Dock-in is maintenance-free. However, for safety reasons it is recommendable to check all mounting screws and moving parts at regular intervals to ensure that the screws are fixed securely in the wall and in the washbasin.

Cleaning

Do not use a high-pressure washer to clean this product. Simply use a soft cloth or sponge with soapy water (pH7) of max. 60°C or cleaning alcohol. If a detergent is used the surface of the tabletop may get greasy after some time. This may be removed with equal parts water and chlorine. Clean the Dock-in station at regular intervals to prevent dirt from sticking to the surfaces.

Important:

Do not use scouring powder or other abrasives as they may scratch the surfaces. Also avoid the use of cleaning utensils with sharp edges. Never use strong acids or alkaline products.

Fault finding

Error	Possible remedy
Washbasin cannot be locked	Check that washbasin and Dock-in have been installed as prescribed. Check that they are both level and that the mounting screws are fastened securely in the wall.
Washbasin is locked, but cannot be released	Check if the locking screws are tightened. See page 5. If so please loosen or remove these.
Washbasin hits Dock-in station and cannot reach locking mechanism	Check that washbasin and Dock-in have been installed as prescribed. Check that they are both level and that the mounting screws are fastened securely in the wall.

Waste handling

Used equipment must be disposed of according to national law. We recommend dismantling of the product to the greatest possible extent so that most parts may be reused. Example of sorting groups: Metal and compact laminate.

Normal use

Temperature: 0 °C to 50 °C

Relative humidity: 5% to 85% non-condensing

Storage and transport

Fragile

Keep away from water
