

”A table that makes a difference”

ROPOX GET UP

GIVING YOU SUPPORT TO SIT AND STAND

Get-up is a mobile table with a person-lifter, that helps you stand up and sit down, and the table's features are designed specifically to make the situation as easy as possible. The table is often used for training purposes in ergo- and physiotherapy or as an aid in private homes.

The arm supports and handles support the user when shifting position and the table height is easy to adjust to suit the user at the table. You can also mount knee- and back-supports as extra help to get up or sit down.

The Get-up has many individual adjustment possibilities and is unique since the table height adjustment and the person lifter can be activated separately or simultaneously. This gives the user a sense of comfort and safety.

It is good for the body to stand up in order to increase blood circulation and with this product, this exercise becomes pleasant.

The Get-up is a safe and stable support in situations where help is needed and it can provide you with the ability to manage your daily activities with less help from others.
